

Emergency Medical Technician Course

UWCHLAN AMBULANCE CORPS

...Making a difference

Learn how to provide pre-hospital care, comfort, and compassion for ill or injured patients during transport to a medical facility! This 160 hour (approximately) course is a combination of classroom lecture and practical skill days. The class will meet on Monday and Wednesday Evenings, and every other Saturday from late August until mid-December. The course covers the overall roles and responsibilities of the EMT, general anatomy and physiology, patient assessment, CPR, bleeding control, care of musculoskeletal injuries, medical emergencies, childbirth, pediatric emergencies, environmental emergencies, ambulance operations, and personal safety. Successful completion of the course will allow the participant to test at both the State and National level testing to achieve certification.

Participants must be at least 16 years old on the first day of class (18 to be able to test for the National Registry). Current EMR certification is recommended, but not required.
